

Information Security Management System Policy

Business processes are increasingly moving beyond the borders of countries. This globalisation requires not only the availability of Orion-wide communication and information systems, but also the use of Orion solutions worldwide.

Orion is committed to protecting the confidentiality and integrity of personal information about its employees, customers, solution partners (including related persons within customers and Solution Partners) and other identifiable individuals. Orion complies with applicable country laws and contracts relating to the collection, use, disclosure, retention, access, transfer or other processing of such information, including processing, disclosing and/or transferring personal information in a fair and appropriate manner, but only under appropriate conditions.

To realise by evaluating the risks in order to ensure the confidentiality, integrity and usability of information in all business processes, and to improve by ensuring its continuity,

Developing technologies, Cloud Platforms, Artificial Intelligence, Machine Learning, Cyber Security and Cyber Resilience,

Full compliance with the legal regulations of the countries in which it operates and the relevant countries in which it provides services within the framework of contracts,
It undertakes to report any negative situation to the relevant institutions and organisations.

General Manager / CEO
